

The best day is today, glad to greet from
Snowmobile community of Siberia & Urals
also snowmobile trunks production
joint company born in Russia

BASEG team produces unique trunks for snowmobiles designed and manufactured in cooperation with snowmobile community for various models of the snowmobiles with respect of their purpose and features of construction. Continuous feedback from the owners of the snowmobiles is received during manufacture. More than 60,000 machines for 10 years have been equipped with our snowmobile trunk bags. We have made them capacious, durable and convenient which made them essential attribute for many our customers. We produce our goods in Siberia, as snow-riders for snow-riders, and now the first time ready to offer our successful experience to the whole world.

BASEG Ltd. are interested in the new markets, communication and partnership with snowmobile clubs, associations, snow internet forums moderators, snowmobile equipment traders, bloggers & influencers, and all the people who are carried away by snowmobile using and sport. We'd investigate markets and have to offer special prices, organized logistics, and favorable conditions for dealers and distributors in the USA, Canada, Sweden, Denmark, Finland and Norway markets. Up to 3000 of trunks can be produced per month, more than 4000 trunks in stock, more than 5500 trunks sold each season in Siberia market only.

Joint international snowmobile expeditions in different places of our planet, exchange of experience and invitations to routes are also interesting to us.

- Big volume that allows you to take **all your needs**
- All necessary things always **with you**
- Organize inner space with **partitions**
- It will **not break** in case of extremely low temperature or accident
- It will **not hurt** you in case of overturn
- You can disassemble it (polyethylene foam walls)

BASEG outdoor is twenty years' experience in the industry of goods for tourism and active. The BASEG outdoor team are the friends of different extreme sport and tourism clubs and

associations, travel bloggers, tour-operators, organizers of competitions, expeditions and championships. We are open for all in whose heart fire of passion still light, who inspired of adventures out of borders, out of any barriers and circumstances. Our mission is development of availability, technological effectiveness and safety in extreme tourism and sport, therefore the BASEG company is engaged in development and own production of equipment for active sport and tourism, constantly improves the equipment, testing it on travel and equipping teams for expeditions: catamarans, backpacks, safety vests, clothes and thermal underwear. With the best goods we aspire on the new markets to acquaint users with it, and today we are ready to offer more than 80 models of frame-textile trunks practically on all types of snowmobiles. It is possible to get acquainted with our goods, retail price and a model range on the retail website: www.baseg-pro.com We're ready to suggest individual wholesale discount more than a half of market price, making you more than 100% margin for providing a good profit, first because of transporting, from the manufacturing plant directly in Russia, optimization. Looking for snowmobile clubs and associations, outdoor forums, blogs, channels, magazines, marketplaces and snowmobile equipment shops, multibrand professional distributors, snowtech service-centres, representatives of a snowmobile producers.

Write us about your opportunities, and let's discuss special offers for official partnership! Preorder, accumulative system of discounts, Branding for your club name flag, website and EXPO product advertising support.

We consider specifics of use, the requirement and priorities of users.

We create practical and reliable snowmobile equipment for convenience and safety.

Safety - the main advantage of a semi-hard frame-textile trunk - does not collapse and does not injure a rider at an emergency.

Durability - the most important characteristic of a semi-hard frame-textile trunk - keeps elasticity at any frost.

Reliability - we apply only the checked, quality materials and accessories.

Practicality - we expand opportunities, we increase the volume of the transported luggage and its safety!

- it is easy to sort a semi-hard frame-textile trunk of BASEG for repair, washing, compact storage!

In a design of a trunk we realized technology solutions increasing reliability and convenience

- in some models we provided an opportunity to change internal space because of the removable partitions which are fixed on the special "velcro" sistem in different provisions;

- volume suspensions on locks - for usability in mittens;

- zipper of the top cover of a trunk closes by special valve for protection against snow;

- some models are completed with a storm cover - for protection snowmobile against snow and dirt;

- the system of trunk fixing adapted & provided to concrete model of the snowmobile, in special cases we provided necessary toolkit

for various options of installation included in delivery package;

- tight insert protect luggage from soaking and pollution;

- on some models of trunks belts, lacings and loops for external fastening are provided.
